

Hero Ultra 300 Pro

SKU SH20831-300-Pro

PRICE £595

FEATURES

- Improves 4G signal and voice calls on eir, Vodafone, Three, and most Irish networks, with support for an advanced level of 5G coverage.
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Ultra 300 Pro is designed to bring stable mobile connectivity into your home or workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, or low-coverage areas across Ireland. Signal Hero Ultra supports all major Irish mobile networks, providing reliable **4G voice and data along with advanced 5G** coverage where available. The system performs **best where outdoor signal strength is around 1-2 bars**. An external antenna captures available signal, transfers it through professional-grade cabling to the booster, and redistributes the improved signal indoors via a panel antenna, delivering clearer calls and more consistent mobile data throughout the property. With a high connection range and the ability to utilise signals from multiple nearby cell masts, it is ideal for offices, larger homes, and buildings with multiple network users needing stable service simultaneously.

Installation follows a proven layout widely used across Irish homes and properties. Our Ireland-based support team assists before and after purchase, with no subscriptions required.

Signal Hero Ultra also includes a 60-day money-back guarantee and a 3-year warranty for added peace of mind.

INSTANT SIGNAL BOOST

UP TO +72db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20831-300-Pro
FREQUENCIES	BAND 20, 8, 3 and 1 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
