

Hero Max 300

SKU SH2820831-300

PRICE €645

FEATURES

- Improves 4G and 5G signal, voice calls and SMS on eir, Vodafone, Three, and other Irish networks, with full 5G coverage support.
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 300 is built to deliver stable mobile connectivity throughout your home or workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across Ireland. Designed as a universal solution, Signal Hero Max 300 **supports all major Irish mobile networks, providing reliable 4G voice and data along with strong 5G coverage** capacity where available. Its advanced architecture efficiently handles modern 5G frequencies.

An external antenna captures available outdoor signal and transfers it via professional-grade cabling to the booster unit. The improved signal is then redistributed indoors through a panel antenna, resulting in clearer calls, stronger signal bars, and more stable 4G and 5G mobile data. With high connection range and the ability to work with multiple nearby cell masts, it is ideal for offices, medium-sized homes, properties using several mobile providers, or locations where many users require dependable service simultaneously. Installation follows a proven Irish-standard layout. No subscriptions or ongoing fees. **A 60-day money-back guarantee and 3-year warranty provide added confidence.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

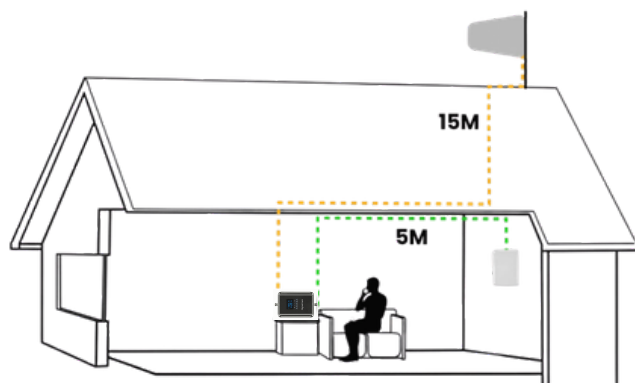

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH2820831-300
FREQUENCIES	BAND 28 20, 8, 3 and 1 700 Mhz / 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<2 Kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
