

Hero Force 1000 Pro

SKU SH2031-1000-Pro

PRICE €985/ ~~€1185~~

FEATURES

- Improves 4G signal and voice calls on eir, Vodafone, Three, and most Irish networks, with support for basic 5G coverage.
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G mobile data indoors

ABOUT

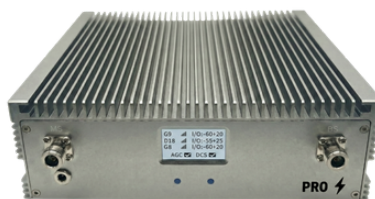

Reliable signal starts outside — and Signal Hero Force 1000 Pro is built to bring it indoors across properties up to 1000 sqm. Missed calls, dropped connections and unstable data don't have to be part of daily life in rural, semi-urban or low-coverage areas.

Designed as a universal solution, Signal Hero Force Pro 1000 supports all major mobile networks, delivering stable 4G, basic 5G network data and reliable voice calls across larger homes and buildings. It captures available signal from the nearest cell tower using a dedicated outdoor antenna, transfers it through professional-grade cabling to the booster, and redistributes it indoors via panel antennas. This setup is ideal where outdoor signal exists but struggles to reach throughout the property.

It works effectively for everyday mobile use and 4G SIM routers, helping stabilise both calls and mobile data across wider floor areas.

Installation follows a proven residential layout, and our Ireland-based support team is available before and after purchase.

No subscriptions or ongoing fees. **Includes a 60-day money-back guarantee and a 3-year warranty.**

 INSTANT SIGNAL BOOST

 UP TO +80db GAIN

 SUPPORTS UP TO 100 USERS CONNECTIONS

 FAST NETWORK & DATA SPEED

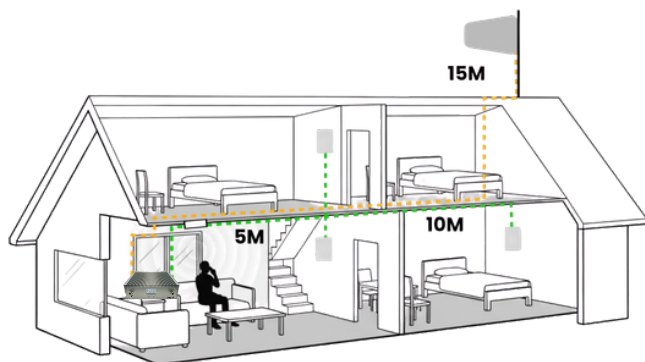

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH2031-1000-Pro
FREQUENCIES	BAND 20, 3 and 1 800 MHz / 1800 MHz / 2100MHz
MAX GAIN	80 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
WORKING TEMPERATURE	-25°C ~+55°C
BOOSTER DIMENSIONS	26.5 x 25 x 8 cm
BOOSTER WEIGHT	<4.5Kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
