

Hero One 600

SKU SH20-600

PRICE €325

FEATURES

- Improves 4G signal for eir, Vodafone, and Three.
- Ideal for rural and remote locations where nearby cell towers are limited
- Delivers clearer calls and more reliable 4G mobile data indoors

ABOUT

Reliable signal begins outside – and Signal Hero One 600 is designed to bring it properly indoors. Missed calls, patchy audio, and unstable data don’t have to be normal in rural or low-coverage locations where indoor signal struggles to reach usable levels.

Built for properties mainly using a single mobile network, Signal Hero One collects available outdoor signal through a dedicated external antenna, transfers it via high-grade cabling to the booster unit, and redistributes the strengthened signal inside through a panel antenna. It’s particularly suited to homes with limited nearby towers and households relying on one provider.

It works especially well with 4G SIM routers, helping stabilise both calls and mobile data where outdoor signal exists but drops significantly indoors. The Signal Hero One 600 version extends indoor coverage using two antennas, making it a better fit for larger properties.

Installation follows a straightforward, proven layout commonly used in residential and rural settings. Our Ireland-based support team is available to assist before and after purchase.

There are no subscriptions or ongoing costs. Every unit includes a **60-day money-back guarantee and a 3-year warranty** for added peace of mind.

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 5 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

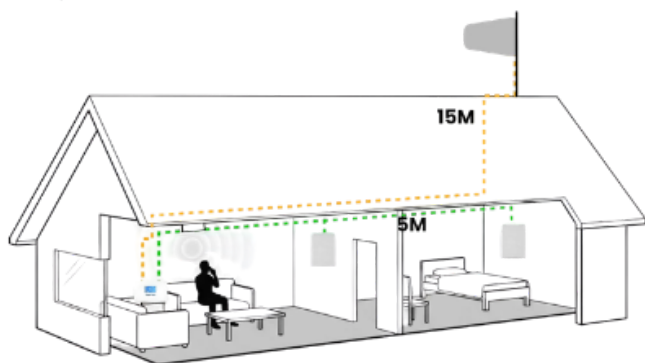

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20-600
FREQUENCIES	BAND 20 800 MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100–240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	20.6 x 12.5 x 4.8 cm
BOOSTER WEIGHT	<0.6Kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
