

Hero Force 600

SKU SH2031-600

PRICE €525

FEATURES

- Improves 4G signal and voice calls on eir, Vodafone, Three, and most Irish networks, with support for basic 5G coverage.
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations.
- Delivers clearer calls and more stable 4G mobile data indoors.

ABOUT

Reliable signal starts at the source — and Signal Hero Force is designed to bring it consistently indoors. Missed calls, dropped connections and unstable data don't have to be part of daily life in rural, semi-urban or low-coverage areas. The system is built to cover properties up to 600 sqm, making it suitable for medium to large homes and buildings.

As a universal solution, Signal Hero Force supports all major mobile networks, **delivering stable 4G data, reliable voice calls and basic 5G coverage where available.** It captures available signal from the nearest cell tower using a dedicated outdoor antenna, transfers it through professional-grade cabling to the booster unit, and redistributes the strengthened signal indoors via a panel antenna. This setup is ideal where outdoor signal exists but struggles to reach inside larger properties.

Signal Hero Force works effectively for everyday mobile use and 4G SIM routers, helping stabilise calls and mobile data throughout the property. Installation follows a proven layout used in residential and rural environments. Our Ireland-based support team is available before and after purchase.

There are no subscriptions or ongoing fees. **Every unit includes a 60-day money-back guarantee and a 3-year warranty** for added peace of mind.

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

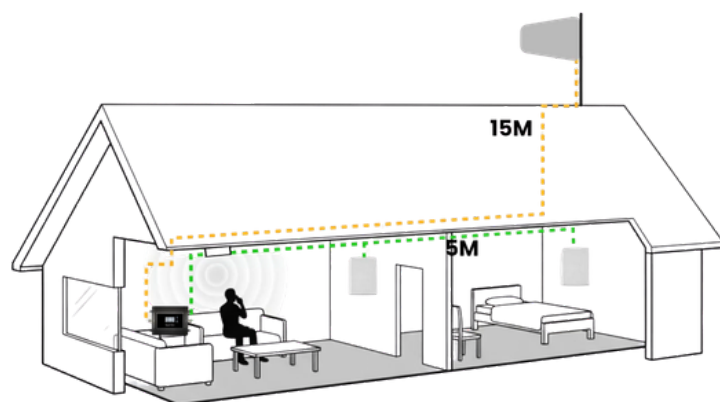

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH2031-600
FREQUENCIES	BAND 20, 3 and 1 800 MHz / 1800 MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
