

Hero Ultra 600 Pro

SKU SH20831-600-Pro

PRICE €645

FEATURES

- Improves 4G signal and voice calls on eir, Vodafone, Three, and most Irish networks, with support for an advanced level of 5G coverage.
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Ultra 600 Pro is designed to deliver stable mobile connectivity to larger homes and workplaces. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, or low-coverage areas across Ireland. The system supports all major Irish mobile networks, providing reliable 4G voice and data along with advanced 5G coverage where available. **It performs most effectively in locations where outdoor signal strength ranges between 1-2 bars.** An external antenna captures the available signal, transfers it via professional-grade cabling to the booster, and redistributes the enhanced signal indoors.

With multiple indoor antenna connections, **Signal Hero Ultra 600 Pro is suitable for spaces up to approximately 600 sqm**, ensuring balanced coverage across offices, large homes, warehouses, and multi-room buildings. Its strong connection range and ability to utilise signals from multiple nearby cell masts allow several users to enjoy stable service at the same time.

Installation follows a proven layout widely used across Irish homes and properties. Our Ireland-based support team assists before and after purchase.

The system includes a 60-day money-back guarantee and a 3-year warranty for added confidence.

INSTANT SIGNAL BOOST

UP TO +72db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

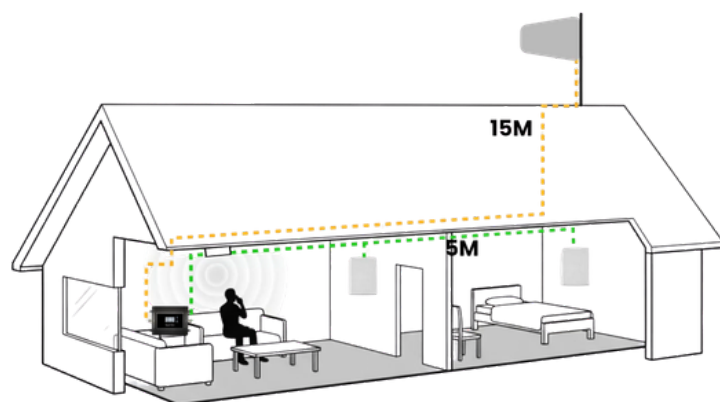

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20831-600-Pro
FREQUENCIES	BAND 20, 8, 3 and 1 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
